SUMMARY

AI/ML Engineer with a strong foundation in mathematics and statistics (MSc, NIT Warangal) and hands-on experience building **machine learning** and **Generative AI** solutions, including enterprise-scale AI-driven analytics at Boeing (via Quest Global). Skilled in **Python**-based ML development, from data preprocessing through model evaluation, with growing exposure to **RAG** workflows and backend integration of AI capabilities into applications..

EDUCATION

National Institute of Technology, Warangal <i>MSc Mathematics and Scientific Computing CGPA: 7.85</i>	2024 - 2026
Choudhary Devi Lal University, Sirsa <i>BSc Non-Medical (Mathematics, Physics, Chemistry) CGPA: 8.0</i>	2020 - 2023

EXPERIENCE

Quest Global <i>AI/ML Engineer Intern</i>	March 2026 - Present <i>Hyderabad, India</i>
Boeing: Applied machine learning and statistical modeling techniques to develop AI-driven analytical solutions using Palantir, converting enterprise-scale datasets into actionable business insights for Boeing operations. - Managed end-to-end delivery of AI agent workflows for intelligent automation, insight generation, and operational analytics, ensuring alignment with business objectives.	
Makeofwelding <i>Summer Data Analyst Intern</i>	May 2025 - Jul 2025 <i>Sirsa, India</i>
- Applied statistical analysis and data modeling techniques (SQL, Excel) to identify business performance trends and growth opportunities, delivering actionable insights to stakeholders. - Designed KPI dashboards for data visualization and analytical reporting, supporting data-driven decision-making across the business.	

PROJECTS

RAG Document Q&A System
Built a full-stack Retrieval-Augmented Generation system using LangChain, FAISS, and FastAPI enabling multi-format document upload with grounded Q&A and cited sources; implemented prompt chaining, embeddings, and swappable Groq/Hugging Face LLM providers. Deployed a React frontend and containerized Docker backend to production on AWS EC2 with an nginx reverse proxy and SSL, resolving memory and disk constraints on free-tier infrastructure.
Lung Cancer Detection Model
Built a predictive ML model using Random Forest and Scikit-learn applying statistical modeling for automated cancer stage prediction achieving 95% accuracy; applied feature engineering, data preprocessing, and hyperparameter tuning via RandomizedSearchCV.

TECHNICAL SKILLS

Core: Machine Learning, Statistical Modeling, Statistical Analysis, Data Analysis, Predictive Analytics, Python AI/ML & Data Science: Deep Learning, NLP, Feature Engineering, Data Preprocessing, Model Evaluation, Hyperparameter Tuning Generative AI: AI Agents, RAG, Embeddings, Prompt Engineering, AWS Bedrock, LLM Applications, Agentic Workflows	Libraries & Frameworks: NumPy, Pandas, Scikit-learn, PyTorch*, Matplotlib, Seaborn, Streamlit, Pydantic Backend & Tools: FastAPI, Docker*, SQL, Git, Palantir, AWS, MySQL Workbench, Google Workspace Soft Skills: Problem Solving, Analytical Thinking, Cross-Functional Collaboration, Adaptability
*Intermediate Proficiency	

RESPONSIBILITIES

General Secretary , Mathematical Society, NITW	Sept 2025 - April 2026
Head of Design , SDC, NITW	Oct 2024 - April 2026
President , Physics Subject Society, GNC Sirsa	Jun 2022 - Jun 2023

ACHIEVEMENTS

- AIR 501** in IIT JAM 2024
- Received **All Rounder Award** (College Color + Merit Certification) at GNC Sirsa
- Secured a position among the **Top 0.1%** of appeared candidates in March 2018 Secondary Examination
